Contact your Milton Rents Representative:

Dear Duke Company Customer,

As you may have heard, The Duke Company has been acquired by Milton Rents, an equipment rental services company headquartered in Plaistow, NH.

Milton Rents was established in 2018 with three New Hampshire locations and 25 employees. Since that time, the company has added six additional facilities across Maine and Massachusetts and has grown to over 100 employees. We believe that combining The Duke Company's offerings with Milton Rents' ability to stock and rent low-hour, late-model Caterpillar equipment and work tools will be a significant advantage for customers. We have also heard from customers of the value they see in the stocking of a wide range of building materials and products and that will remain in place.

Since its start in 2003, The Duke Company has prioritized building relationships with customers to provide complete solutions for their unique needs. That commitment to customers will remain under the new name as Milton Rents shares this same mindset. Through the acquisition, we hope to further enable and enhance Duke employees' passion for helping their customers succeed. In addition to the shared dedication to customers, The Duke Company's track record of investing in new products and services to support Upstate New York contractors aligns with the Milton Rents vision.

Duke Company President David Terry recently commented to me that, "The Duke Company and Milton Rents share the philosophy of hiring good people and treating customers the same way you would like to be treated" and I couldn't agree more. These common values are what brought us together and will be the foundation for us as we continue to support your company's operation and success.

Thank you for your continued business and we look forward to serving you as Milton Rents.

Sincerely,

Chris Milton
